News Release

## **USfalcon Achieves ISO 9001:2000 Certification**

Morrisville, N.C. – **USfalcon Inc.**, announced that it has achieved ISO 9001:2000 certification from BSI Management Systems, a leading quality management systems certification body.

ISO 9001:2000 is an internationally recognized quality management system standard developed by the International Organization for Standardization (ISO). To be certified to the standard, companies must implement a well documented quality management system (QMS) that ensures consistency and improvement of working practices, including the products and services produced. Certification to ISO 9001:2000 reinforces to customers, through an independent third-party, that **USfalcon** operates a QMS in accordance with the standard.

"The **USfalcon** mission is to contribute significantly to our customer's success" stated Peter von Jess, CEO and Chairman of the Board. "To help achieve this we are dedicated to providing quality solutions framed by our quality processes."

MG(R) Dave Gust, President of **USfalcon** said, "The timeframe in which we achieved certification is remarkable and a testament to the dedication to quality by **USfalcon** employees."

**USfalcon** began its registration process in February, 2007. As part of the ISO 9001:2000 certification process, BSI performed on-site assessments; examined documented procedures, and audited the overall operations of **USfalcon**. To determine continued compliance with ISO 9001:2000, BSI will periodically conduct routine surveillance audits of the **USfalcon** business operations.

"**USfalcon** management determined that ISO 9001:2000 certification was going to be a critical element in offering world-class solutions," stated San Buonassisi, **USfalcon** Quality Director. "**USfalcon** employees worked diligently to design, document and socialize their processes, to ensure conformance. We are very proud to have gained certification."

"By earning ISO 9001:2000 certification **USfalcon** is further demonstrating its commitment to quality," said Gary Pearsons, President of BSI Management Systems. "By formalizing their documentation and using ISO 9001:2000 as an extra set of eyes, **USfalcon**, will be able to improve quality and remain at the cutting edge of their industry. The company's employees are committed and use

well organized processes – ISO 9001:2000 certification can only serve to improve an already top-of-the-line business.”

### **About BSI Management Systems**

BSI is the world's leading management systems registrar. Founded in 1901, BSI has certified more than 60,000 locations in nearly 90 countries. Many 'Global 500' companies have chosen BSI as their preferred ISO 9001:2000, ISO/TS 16949:2002, ISO 14001:2004 or ISO/IEC 27001:2005 registrar. BSI's registration experience covers virtually every industrial and commercial sector (i.e. automotive, aerospace, chemical and allied processes, IT/software, and service). BSI Management Systems America, Inc. is headquartered in Reston, Virginia, with offices in Toronto, Canada, and Mexico City, Mexico to serve the North American market. BSI is truly a pioneering organization. Visit the BSI website at: [www.bsiamericas.com](http://www.bsiamericas.com)
